

Perform Web Servers and Applications Vulnerability Scanning using Nikto CGI Scanner

ILABS
CEH PRACTICAL

@mmar

Nikto is an Open Source (GPL) web server scanner that performs comprehensive tests against web servers for multiple items, including over 6700 potentially dangerous files/programs, checks for outdated versions of over 1250 servers, and version specific problems on over 270 servers. It also checks for server configuration items such as the presence of multiple index files and HTTP server options; it will also attempt to identify installed web servers and software

Aim

In this task, we will use Nikto to scan web servers and applications for vulnerabilities

DEMO

A grayscale photograph of a calm sea with a small structure on the right and mountains in the background. The word 'THANKS' is overlaid in the center.

THANKS
