

Perform Vulnerability Research in Common Weakness Enumeration (CWE)

ILABS

CEH PRACTICAL

@mmar

Aim

Common Weakness Enumeration (CWE) is a category system for software vulnerabilities and weaknesses. It has numerous categories of weaknesses that means that CWE can be effectively employed by the community as a baseline for weakness identification, mitigation, and prevention efforts. Further, CWE has an advanced search technique with which you can search and view the weaknesses based on research concepts, development concepts, and architectural concepts.

Here, we will use CWE to view the latest underlying system vulnerabilities.

DEMO

A grayscale photograph of a calm sea with a small structure on the right and mountains in the background. The word 'THANKS' is overlaid in the center.

THANKS
